Objective

I'm an enthusiastic software developer with a strong passion for using artificial intelligence to make a positive impact on our environment and society. I'm on the lookout for a challenging role where I can apply my AI skills to come up with smart solutions for reducing pollution, preserving the environment, and boosting privacy. I'm excited about joining a team that thinks ahead and is dedicated to tackling societal concerns linked to AI. My goal is to help minimize any downsides and contribute to creating a positive view of AI around the globe.

Projects and Experiences

Inventory Management System

2023 - Present

- As group of two built an Inventory management system innovatively.
- Designed Software using python ,MySQL and building frontend to make it market ready.
- I looked after python and its libraries whereas my teammate worked on MySQL part to integrate data base to the software.
- Working together on frontend to make it market ready using HTML, CSS and Javascript.
- This system will update the inventory values in realtime and also help sales boost exponentially by

Panoptic Image Segmentation

2024 - present

Implemented panoptic image segmentation using Detectron2, combining instance and semantic segmentation.

Used Detectron2's pre-trained models and fine-tuned on a custom/standard dataset.

Uploaded images to the model for inference (non-real-time processing).

Evaluated results using Panoptic Quality (PQ) metrics with visual segmentation outputs.

Education

St Joseph's Secondary School

2015 - 2019

- Seventh to tenth grade (CISCE)

NRI Junior College

2019 - 2021

- 11th and 12th grade (BIEAP)

VIT Bhopal University

2022 - present

- Integrated MTech in Artificial Intelligence (9.14 CGPA)
- Currently in 4th year

Skills

- Advanced Java Programmer
- Medium level Python Programmer
- Medium Level C Language Programmer
- Basics in HTML, CSS and Java Script
- Problem-solving
- Creativity
- Time Management
- Communication Skill
